DETAILED ACTION

Claim Rejections - 35 USC § 112

Claim 19 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 19 recites "having an approximately cylindrical, and in particular slightly conical configuration". The phrase " and in particular" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Allowable Subject Matter

Claims 1-18 and 20 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Claim 1 recites "wherein said centrifugal separator includes at least two cyclones, and wherein discharge flows from said cyclones are respectfully combined in pairs; and a common suction tube, wherein said paired discharge flows open out into said suction tube". Uhl et al(2004/0231633) discloses an intake system for the combustion air of a motor of a hand held implement, including an air filter having a clean chamber connected with a carburetor of the motor, a centrifugal separator, wherein the centrifugal separator includes at least two cyclones(19). However the discharge flows are not combined in pairs. The discharge flows combine together and flow to a

phication, control (tamber: 10,002,00

return(20) which leads to a fan wheel of the parting off grinder. Also the effective filing date of the publication is May 20, 2004, therefore the reference is not a valid 102(e) Linsbauer et al(6681726) discloses an intake system for the combustion air of a motor of a hand held implement, including an air filter having a clean chamber connected with a carburetor of the motor, a centrifugal separator, wherein the centrifugal separator includes a single cyclone separator having a discharge flow in connection with a suction tube(33). However, Linsbauer et al does not disclose at least two cyclones, and wherein discharge flows from said cyclones are respectfully combined in pairs; and a common suction tube, wherein said paired discharge flows open out into said suction tube. Lincoln(2424572) discloses a dust collector having a plurality of parallel vortex separators, wherein a pair of converging dust outlets(11) lead to a single receiving chamber. However, Lincoln does not disclose that the receiving chamber is a common suction tube, and also does not disclose an air filter having a clean chamber which is fluidically connected with a carburetor of a motor. Koslow(4537608), Durre et al(4746340), and Axmann et al(3877454) all disclose an air cleaner including a plurality of vortex separators, wherein the discharge flows from all of the cyclones flow into a common suction tube. It would not have been obvious to someone of ordinary skill in the art at the time of the invention to provide a centrifugal separator which includes at least two cyclones, and wherein discharge flows from said cyclones are respectfully combined in pairs; and a common suction tube, wherein said paired discharge flows open out into said suction tube because none of the references

above, alone or combined, suggest such a combination. Claims 2-18 and 20 depend on claim 1 and hence are also allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert A Hopkins whose telephone number is 571-272-1159. The examiner can normally be reached on Monday-Friday, 7am-4pm, alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Duane Smith can be reached on 571-272-1166. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
